Authorize

Dashboard

Dashboard analytics and summary endpoints

GET /api/dashboard/trends Get monthly trends

GET /api/dashboard/summary Get dashboard summary

GET /api/dashboard/recent Get recent transactions

GET /api/dashboard/category-wise Get category breakdown

Authentication User authentication endpoints

POST /api/auth/register Register a new user

POST /api/auth/login User login

User Management User management endpoints (Admin only)

GET /api/users/{id} Get user by ID

PUT /api/users/{id} Update user

DELETE /api/users/{id} Delete user

GET /api/users Get all users

Financial Records Financial record management endpoints

GET /api/records/{id} Get record by ID

PUT /api/records/{id} Update record

DELETE /api/records/{id} Delete record

GET /api/records Get all records

POST /api/records Create financial record

GET /api/records/filter/type Get records by type

GET /api/records/filter/date-range Get records by date range

GET /api/records/filter/category Get records by category

Schemas

UserResponse

```
{
    id          [...]
    username    [...]
    email       [...]
    role        [...]
    active      [...]
    createdAt   [...]
    updatedAt   [...]
}
```

FinancialRecordRequest

```
{
    amount*                 [...]
    type*                   [...]
    category*               [...]
    date*                   [...]
    description             [...]
}
```

FinancialRecordResponse

```
{
    id                      [...]
    amount                  [...]
    type                    [...]
    category                [...]
    date                    [...]
    description             [...]
    createdAt               [...]
    updatedAt               [...]
}
```

RegisterRequest

```
{
    username*               [...]
    email*                  [...]
    password*               [...]
    role                    [...]
}
```

LoginRequest

```
{
    email*                    [...]
    password*                 [...]
}
```

LoginResponse

```
{
    token                     [...]
    userId                    [...]
    username                  [...]
    email                     [...]
    role                      [...]
    message                   [...]
}
```

Pageable

```
{
    page                      [...]
    size                      [...]
    sort                      [...]
}
```

PageUserResponse {
